## ABOUT ME

---

A front-end developer and graphic designer who specializes in creating visually engaging and user-friendly digital experiences. I combine strong technical skills with creative design to build responsive interfaces that deliver functionality and aesthetic appeal.

## EDUCATION

---

**Bachelor of Technology**, D. Y. Patil International University  
Computer Science and Engineering

## SKILLS

---

<b>Technical Skills</b>	Python,HTML, CSS, JavaScript, ReactJs, NodeJs, jQuery, Expressjs, Solidity
<b>Other Skills</b>	Graphics Design, Illustration, Figma, Adobe Illustrator

## EXPERIENCE

---

<b>Front-End Developer</b> Wajooba LLC.	Aug 2024 - present <i>Remote</i>
--------------------------------------------	-------------------------------------

- Developing a React Native app integrated with Supabase for user-generated coffee recipes and seamless real-time data handling.
- Designing and maintaining an e-commerce website using Wix to sell coffee accessories, ensuring a visually appealing and user-friendly interface.
- Collaborating on scaling app architecture and implementing new features to enhance user engagement.

<b>Intern</b> Wajooba LLC.	Feb 2023 - Aug 2023 <i>Remote, Pune.</i>
-------------------------------	---------------------------------------------

- Developed and helped testing of Solidity smart contracts for blockchain applications.
- Conducted comprehensive testing and debugging of smart contracts to ensure functionality.
- Designed wireframes and built high-fidelity prototypes for a web application.
- Implemented the front-end interface using modern web technologies for seamless user experience.
- Authored clear and concise project documentation to support future development.

<b>Intern</b> In-house Internship DYPIU	Jun 2021 - Aug 2021 <i>Remote, Pune</i>
--------------------------------------------	--------------------------------------------

- Automated home appliances and lighting systems using IoT technology for smart home solutions.
- Developed an Android app using Blynk libraries for remote control of appliances.
- Integrated ESP32 microprocessor with various hardware components to achieve automation.

## PROJECTS

---

### BrewTime

- Developed a React Native app with Supabase, featuring user-generated recipes, real-time updates, and a dynamic, intuitive interface.

## **Open-EXC (DApp Token Exchange)**

- Developed a full-featured cryptocurrency exchange using Hardhat and Node.js, deployed on the Polygon testnet.
- Integrated advanced trading features such as candlestick graphs, real-time token price data, and essential tools for traders.

## **T-Portals NFT Project**

- Created a unique AI-generated NFT collection, avoiding traditional layer-based formations commonly used on platforms like OpenSea.

## **Inner Echoes.**

- Built a personal blog using EJS and Express.js, showcasing a simple yet dynamic approach to content presentation.

## **Design of Embedded Systems in Home automation**

- Focused on automating daily home appliances with IoT technologies, enhancing comfort and convenience in smart homes.

## **Otaku compass**

- Developed a comprehensive anime search and recommendation platform, enabling users to explore a vast anime database and receive personalized viewing suggestions.

## **CERTIFICATIONS**

---

- The Complete 2024 Web Development Bootcamp
- The Bits and Bytes of Computer Networking.
- Crash course on python.
- Abstraction, Problem Decomposition, and Functions.
- Blockchain Basics.
- Smart India Hackathon 2022.
